(Paracetamol Pediatric Oral Suspension I.P. 250 mg)

**Composition:**

**Each 5 ml contains:**

Paracetamol I.P.....250mg  
In Flavour base... .....q.s.  
Colour..... Ponceau 4R

**Paracetamol**

**Clinical Pharmacology:**

Fever is due to the interaction of endogenous pyrogen with receptors in that part of the anterior hypothalamus concerned with thermoregulatory control of the body. This interaction involves the local production of prostaglandin E, monoamines and cyclic AMP. Information is transmitted from the anterior hypothalamus to the vasomotor centre which in turn directs sympathetic nerve fibres to constrict peripheral vessels and thereby decrease loss of heat from the body. Paracetamol has a central analgesic effect that is mediated through activation of descending serotonergic pathways. Debate exists about its primary site of action, which may be inhibition of prostaglandin (PG) synthesis or through an active metabolite influencing cannabinoid receptors.

**Indication:**

Paracetamol is common analgesic and antipyretic drug for management of fever and mild-to-moderate pain in infants and children.

**Contraindications:**

Contraindicated Hypersensitivity to Paracetamol.

**Precautions & Warning:**

Intake of Paracetamol should avoid in some situations like improper slimming, smoking, and alcohol abuse causes hepatic damage.

**Drug interaction:**

Paracetamol interact with oral anti-coagulant therapy.

**Adverse effect:**

Hepatic failure, skin rashes, laryngeal oedema and drug fever, Hepatotoxicity.

**Overdose:**

Anorexia, nausea and vomiting.

**Flavour:** Delicious Strawberry Flavour

**Dosage:** As directed by the physician

**For Therapeutic use.s**

**Route of administration:** Oral.

**Store in a cool ,dry & dark place.**
